

**ALIVE
AT 25**

Defensive Driving Course - Alive at 25[®]

It's time for a change in focus.

This young driver intervention program zeroes in on drivers between the ages of 16 and 24 - the group most likely to be involved in fatal collisions. The National Safety Council, a leader in driver improvement training for more than 40 years, developed DDC-Alive at 25 to specifically target drivers in this age group. This highly interactive four-hour program teaches young drivers how to take control of situations by taking responsibility for their own driving behavior.

DDC-Alive at 25 teaches young adults that:

- Inexperience, distractions, and peer pressure cause unique driving hazards.
- Speeding, alcohol, and "party drugs" greatly increase their risk of injury or death.
- As a driver or passenger, they can greatly reduce their risk by taking control.
- Committing to changing their driving behavior makes personal, legal and financial sense.

Safe driving takes a lot more than just learning skills. Equally important are a safe attitude and responsible behavior. When you get behind the wheel, you take on some heavy responsibilities: your own safety and your passengers' safety, the safety of others on the road, your vehicle and others' property... the list goes on and on. Taking these responsibilities seriously greatly reduces the risk of being involved in a collision.

Course Fee: \$40 Pre-registration required. Late arrivals not admitted. The door locks at start time.
